What a time, body and soul meet again. They are fond of each other. Did your body ever have a pain and your soul not re-echo it? Or, changing in earth. In France for about three centuries the almanaes made the year begin at Easter until Charles IX. started the year at January I. In the Tower of London there is kept on the royal pay-roll of Edward I. an entry of Ele for 400 colored and pictured Easter eggs, with which the

Drops of water from the Hudson, and other drops from the East River, and other drops from a stagnant pool out on Newark flats. Up yonder they are em-bodied in a cloud and the sun kindles it. If God can make such a lustrous cloud out of water drops, and some of them riled and upure and fetched up from miles away, can He not transport fragments of bodies from the earth and out of them build in the sky a radiant body? Can the God who owns all the material out of which bones and muscles and flesh are made not set them up again after they have fallen? If through? And if God drop the eye, which he originally fashioned, into dust, can He not restore it? Aye, if the manufacturer of the telescope by the change of the glass and the focus may improve the telescope, could not the fashioner of the eye improve the sight and multiply the natural eye by the thousand-fold additional facilities of the resurrection? The Jewish rabbis' had only a hint of this that in the human frame there was a small bone which they called "luz," and R. I called at my friend's house one summer. I found his front yard piled up with the rubbish of masons and carpenters' work. The door off. The plumbers had torn up the floor. The roof was being lifted and cupolaed. The walls had lost their pictures and the paper-hangers were getting ready and all the modern improvements were to be introduced. There was not a room fit to live in, although a few weeks before when I stopped there it was so beautiful that it did not seem to me that any improvement was possible. My friend had gone with his family to the Holy Land and would not be back until about six months, at which time the house would be complete, and what a time they did have of bright plumage to deck the bonnets of ladies. It is now stated that the murderous practice is to cease, and flowers, more beautiful and appropriate, are to take the place of the birds where Nifley was burring off broom-sage.

A School-boy's Infatuation. [Middleborough Cor. Doston Herald.] A ludicrous affair occurred here a few ays ago. A youth of sixteen became litten with the charms of a lady twentyone years his scular, and his suit was favored, it is said, by the prospective mother-in-law. Having decided to wed, the couple proceeded to the house of a clergy. man to have the knot tied, but the reverend gentleman informed the young man that a marriage license was necessary. Not being dannied, the would-be bridegroom went to the Town Clerk's office for the essential document, but that officer informed him that he could not issue the icense without the consent of the boy's ather, as he was under age. This was a rushing blow, but being informed that the laws of Rhodo Island did not require a narriage license, the persevering couple started for that little State without delay, but only got as far as the Middleborough station, when the trip was cruelty prevented by Oilleer Burgess, who took the

Boston Globe.] A little daughter of Joseph Renner was taken suddenly ill with colic, and the pain was so severe that she went into spasms. The father went after a doctor, but the child was to all appearances dead before the physic an arrived. The child looked as though she were sleeping, though the doctor pronounced her dead. The body was kept for two days, and during that time the skin retained a natural color. child was lying, and after looking at the corpse for a moment put his finger on the pulse and was surprised to feel a feeble fluttering. The pulse heat slowly, but it indicated that life was there, and means were at once used to fan the vital spark into flame. She remained in a state of torpidity for twenty-six days. On the evening of the twenty-sixth day she opened her eyes and feebly asked for a drink of water. From that time on she rapidly gained strength, and is now able

There was an old lady in town Wednesday from near the lower line of Dooly County, whose remarkable activity delame, still that we have two or three use- serves mention. She is now sixty-five years of age, plowed the entire day last Monday, and says she never felt better or of about thirty miles. She bought a buggy two sets of harness, a lot of dry goods, groceries and other supplies, for a portion of which she paid cash and the remainder she had charged to her account, which is an evidence that she is in good circumstances. The old lady certainly possesses a wonderful vitality, and is a "better man" now than most of the young men raised in town. There are very few old men who plow in the field at her age.

> A Terrier with a Conscience. A Skye terrier proved that it could be ashamed of a dishonest act. The master had always treated it well-in fact, it had never been punished. One day the gentleman was at his table. The little Skye saw a cutlet near the edge of the board, and yielded to the temptation to steal the meat. The cutlet was s'yly seized and taken under the sofa. The gentleman pretended not to see the act of theft. But the
